2016 - 2017

Projects

Advance Monitoring System [↗](#)

- My project focused on analyzing the correlation between different variables of a dataset. I implemented python libraries such as Pandas and NumPy,OpenCv etc. The results of my project showed a strong positive correlation of variables.
- Utilized Python libraries such as Pandas and Matplotlib to clean, visualize and analyze a dataset, uncovering a strong positive correlation between two variables.

Drum-Kit Instrumental Project [↗](#)

- Constructed interactive musical instrument with HTML5, CSS3, and JavaScript.
- Implemented a keyboard-based control system for playing the instrument.
- Developed program to produce corresponding musical tones for each keystroke.
- Streamlined code to ensure instrument is highly responsive and efficient
- Created an intuitive user interface to facilitate an enjoyable musical experience.

Doge_food_Services [↗](#)

- Developed a frontend food delivery project utilizing HTML and CSS.
- Implemented features like a multi-page layout, user-friendly navigation, and attractive visuals.
- Constructed a responsive design, suitable for both desktop and mobile devices.
- Creating and designing the webpages to make it more user-friendly and interactive.
